

Application No. 09/719,526
Reply to Office Action of August 16, 2004

Amendments to the Specification:

Please amend the second full paragraph at page 12, lines 11-18 to read as follows:

~~100~~ 50 Pieces of the unit cell produced in the above-mentioned (1) was successively laminated in ~~100~~ 50 layers, and the resultant laminated battery was disposed, on its both sides, with a current collector plate having a gas manifold hole and a cooling water manifold hole each as required. One of the current collector plates was mounted, on its external side, the total heat exchange internal humidifier produced in the above-mentioned (2).
